KB-012 - Onboarding and offboarding: IT checklist

This guide is for hiring managers, HR and new colleagues. It is published as a PDF handout and is given to every new starter on day 1.

1. Before the first day (hiring manager)

1. Submit the New Starter form through HR at least 5 business days before the start date. Later requests cannot guarantee a laptop on day 1.
2. Say which department, office (Jerusalem HQ, Ramallah office or Remote) and role. For a contractor, give the contract end date and the sponsoring manager.
3. IT creates the NakhlaID account 3 business days before the start date and prepares the laptop.
4. The one-time activation link for the first password is emailed to the hiring manager, never to the new starter's personal address.

2. Day 1 (new starter)

1. Collect the laptop at the IT Service Desk counter (Jerusalem HQ floor 2, Ramallah office floor 1). Remote starters receive it by courier the business day before.
2. Open the activation link with your manager and set your password (rules: SP-001).
3. Enrol NakhlaKey and store your 10 backup codes offline (KB-007).
4. Sign in to NakhlaManage and check that the laptop shows Compliant (KB-010).
5. Request the access your role needs at https://access.nakhla.example (KB-011). VPN-Users is added automatically for employees, never for contractors.

3. If something is missing on day 1

- No laptop: ask for a loaner at the Service Desk counter. Ticket category onboarding, priority P2 if the new starter cannot work at all.
- Account or access missing: ticket category onboarding, priority P3. Include the start date and the hiring manager.

4. Leaving Nakhla (offboarding)

1. HR submits the Leaver form at least 5 business days before the last working day.
2. The NakhlaID account is disabled at 18:00 local time on the last working day.
3. The mailbox is kept for 30 days. Forwarding to the manager is set only when HR asks for it.
4. Return the laptop, dock and badge to the IT Service Desk within 5 business days. Remote leavers receive a courier label.

5. Contractors

- Contractor accounts expire automatically at 18:00 on the contract end date recorded by HR.
- To extend, HR updates the contract end date before it passes; the sponsoring manager then renews

access for up to 90 days (KB-011).
- Contractors have no VPN. They work in the VDI portal https://vdi.nakhla.example (KB-016).

Change log

- 1.4 (2026-04-27): activation link goes to the hiring manager.
- 1.0 (2025-02-01): first version.
