KB-013 - NakhlaPrint: FollowMe secure printing quick guide

Printed quick-reference card, posted next to every printer. Keep it short: print, walk, tap, collect.

Printers

Printer	Location
JRS-1F-MFP1	Jerusalem HQ, floor 1, reception area
JRS-3F-MFP1	Jerusalem HQ, floor 3, kitchen
JRS-3F-MFP2	Jerusalem HQ, floor 3, Finance corner (colour)
RML-1F-MFP1	Ramallah office, floor 1

How FollowMe works

1. Print to the queue FollowMe (\\print.nakhla.example\FollowMe). It is the default printer on every company laptop.
2. Walk to any Nakhla printer and tap your badge on the reader.
3. Choose the jobs to release. Jobs wait 24 hours, then they are deleted automatically.

Error codes at the printer or on the laptop

Code	Meaning	What to do
PRN-07	Badge not linked to your account	Open https://print.nakhla.example > My badge and type the 6-character code shown on the printer screen. Tap again.
PRN-21	NakhlaPrint driver missing on the laptop	Install "NakhlaPrint driver 3.1" from Software Center, restart, print again.
PRN-33	Monthly colour quota used up	The colour quota is 200 pages per month. Print in black and white, or ask your manager to approve more in the print portal.

Scanning

Scan to email sends only to @nakhla.example addresses. Scan to USB is disabled.

When to open a ticket

- Paper jam, toner, or a printer error that does not clear after a restart: ticket category hardware, priority P3. Use another printer meanwhile.
- A whole floor or office cannot print: this can be a major incident. Use the P1 threshold in KB-015.
- Executive Office staff: always P1 (KB-016).

Change log

- 2.0 (2026-05-12): PRN-33 colour quota added; printer list updated.
- 1.0 (2025-03-03): first version.
